The Story

Billy the Bully Goat's parents and teachers are at their wits' end! No matter what they do, they cannot get Billy to stop picking on the other kids in his class. Luckily, the Wise Old Goat—a certified goat therapist—has a brilliant plan to stop Billy's bad behavior.

With a little bit of magic dust, some common sense, and family support, Billy will learn just how his words and actions can affect another goat's insides.

Can Billy change his bullying ways? And if so, what will happen when the magic dust wears off?

Last But Not Least...

In today's world, bullying behavior is all around us—in books and movies, on television, and in schools and workplaces all over the world. If children are taught from the earliest ages to respect and accept one another—and to be kind, empathetic, and inclusive upstanders—they can learn to interact with their peers in positive and constructive ways, even during conflicts.

Education is key. We can teach kids to make good choices and to think about how their words and actions affect others.

Empowering children to stand up for themselves and each other can change lives.

Thank you so much for supporting our show!
